

# Bicycle Victoria Bus relocation proposal

19 September 2008

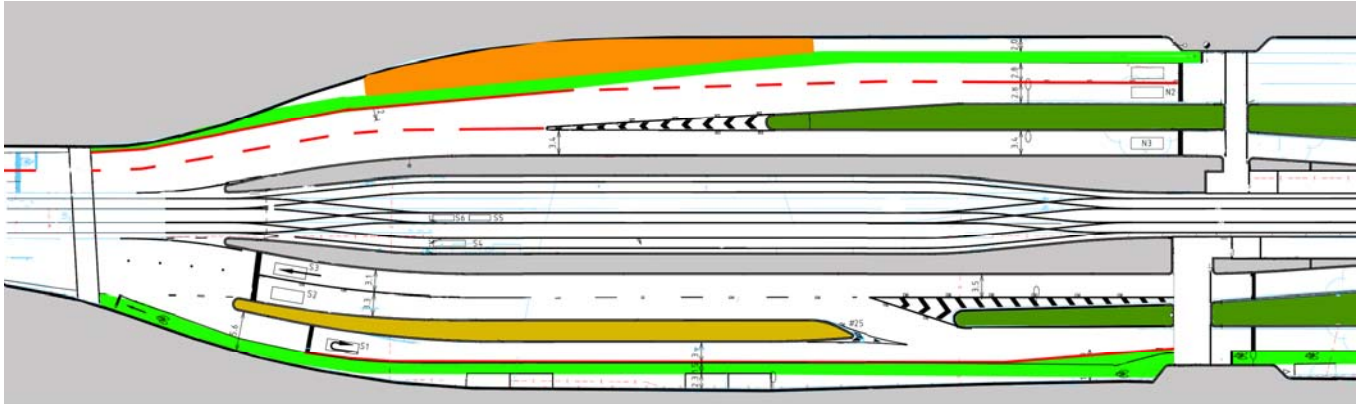

Current configuration

-  Current vehicle lanes
-  Current Bike lanes

By reconfiguring the travel lanes for both bikes and vehicles the bike lane can be improved whilst improving the Bus zone and potential conflicts in this new bus base. This configuration could help to avoid conflict for south (out) bound road users.

Current configuration

- Proposed vehicle lanes
- Proposed Bike lanes
- Proposed Bus Zone

Inbound riders would have an improved space (lower right of diagram) where there is currently a bus stop over the bike lane (refer Image below).
