

Public bike parking

Yes	No	Response
-----	----	----------

Have short term visitor parking rails provided in areas visible by the public and convenient for visitors?
Visitor parking rails should be within 15m of the building entrance.

--

Short term bicycle parking (less than four hours stay) requires less security but should be placed close to destinations (within 15m walking distance) and in open areas with passive public surveillance.

Notes:

Long term bicycle parking for residents and employees and shower/change rooms are covered by building permits and not discussed here

Better:

- Undercover parking for short term (<2hours) public parking
