

Memorandum of Understanding
Between
Bicycle Victoria and Mountain Bike Australia (MTBA)

Bicycle Victoria and Mountain Bike Australia (MTBA) both support and promote responsible mountain bike use. We both support the International Mountain Bike Association's rules of the trail. We agree to work together to get more people mountain biking more often.

How will we work together

Bicycle Victoria will update its web page on mountain biking with a link to the MTBA site, a summary of this agreement and information about how to mountain bike responsibly. MTBA will provide a web site link to Bicycle Victoria and a summary of this agreement.

Mountain Bike Australia and Bicycle Victoria will work together on projects with that will achieve benefits for both organizations. This means:

- more places and trails where people can mountain bike
- more people mountain biking
- a benefit to cycling overall.

Bicycle Victoria will review their Four Networks Challenge campaigns document as part of their overall review of campaigns and incorporate mountain biking more prominently.

Bicycle Victoria and MTBA will consult on projects relating to mountain biking and attempt to project a common position that will get results. We will keep each other informed on mountain bike issues in general and coordinate and focus our efforts on key projects that will produce the best outcomes in the long term.

We won't try and do everything together but will work together more intensively on significant and important projects that we agree mean a lot to both of us. We will review our joint priorities regularly.

We will work together to get more trails available for mountain biking throughout Victoria that will suit a range of potential riders. We will work together on agreed priority projects to establish successful trails available to mountain biking that show an example for future trails.

Signed 28 May 03

Harry Barber	Tony Scott
General Manger, Bicycle Victoria	President, Mountain Bike Australia
