NETWORK**[®]
We've got your back

RESPONSE:

Bikes are an important part of our transport system. Many people now choose to ride, to work, shopping and for recreation, however infrastructure and safety are significant issues faced by cyclists.

As a government we recognise this and have provided significant funding via the TAC to the Geelong City Council to put the infrastructure in place. Unfortunately the Council's inability to do this with consultation and with safety at the forefront has been a failure.

I will continue to advocate for improved and safe infrastructure and request that the Minister consider other means of delivering the much needed bike paths across Geelong. I believe a fair spend on infrastructure is whatever it takes to provide safe and accessible infrastructure.
