

Victorian Election 2022 Party Response

Victorian Greens

The Victorian Greens have committed \$2.5 billion dollars over the next four years to implement a 'Big Bike Build' with hundreds of kilometres of safe and separated bike superhighways and more safe pedestrian crossings, upgraded footpaths and walkable neighbourhoods across the state.

With transport as Victoria's biggest growing source of emissions, governments must do more to support people to make the switch to climate-friendly transport like bike riding and walking.

The Greens' plan would move Victoria towards the goal of active transport funding being 10 - 20 per cent of transport capital funding as recommended by the United Nations.

As part of the power sharing government in Ireland, the Greens have increased active transport funding to 20 per cent, while in Scotland they have increased it to 10 per cent and here in Victoria we should be aiming for the same.
